SOVEREIGN BIO-TRANSMUTATION & FULL-STACK CLOUD ENGINEERING BLUEPRINT

SeedController & No Nut November (NNN) War Room

Complete Start-to-End Platform Architecture, NeonDB PostgreSQL Schema Reference, Live Public API & OAuth2 Key Setup, and Practitioner User Manual

Synthesizing the signature mechanics of SeedController, ASCEND, Seed, NoBeep, Transcend, and Rising Drop into a responsive, cloud-persisted web application powered by Netlify Serverless Functions and NeonDB PostgreSQL.

Platform Stack: HTML5 Canvas 3D • Tailwind CSS • Chart.js • Web Audio API • Node.js Serverless • NeonDB PostgreSQL (`pg.Pool`)

Live APIs Integrated: YouTube Data API v3 • Reddit OAuth2 & JSON Scraper • NIH NCBI PubMed E-Utilities • Pixabay REST API • DummyJSON Quotes

Edition: Version 2.0 Full-Stack Release (October 2026)

1. Executive Overview & Multi-App Feature Synthesis

SeedController is a full-stack, responsive web application engineered for deployment on **Netlify** with cloud persistence powered by **NeonDB (Serverless PostgreSQL)**. Unlike single-purpose habit timers that lose state when browser cache clears or break on narrow mobile viewports, SeedController combines an adaptive glassmorphic interface (`320px` mobile to `4K` desktop) with a resilient dual-layer persistence engine: every streak update, habit completion, urge thermometer log, relapse trigger record, journal reflection, and community post is saved both locally and asynchronously to your NeonDB PostgreSQL database via `/.netlify/functions/api`.

The functional 340-character summary of the platform is: *"SeedController is a responsive, privacy-first semen retention & NNN web app built for Netlify and NeonDB PostgreSQL. It pairs a 3D evolving Aura Orb and dual P/MO streak counters with a 30-day NNN War Room, Top 50 YouTube cinema, live Reddit/PubMed APIs, urge thermometer, breathwork, fasting timer, AI coach, blogs, and journal."*

1.1 How SeedController Unifies Six Leading Retention & Reboot Apps

To create a comprehensive discipline ecosystem, SeedController integrates the core functional pillars of six specialized applications alongside a dedicated **No Nut November (NNN) War Room**:

Inspiration Source	Core Mechanics Adopted	SeedController Implementation Details
SeedController (Core)	Private precision streak counter, daily stoic transmissions, science insights, milestone achievements	Second-by-second live counter (Days, Hours, Minutes, Seconds), 1-click Discreet Privacy Blur (`14px` filter), and automated Aura XP rewards.
ASCEND — Semen Retention	Structured academy curriculum, rank progression, Emergency Urge SOS button, journal, brotherhood wall	8 unlockable ranks (*Seed Initiate* to *Brahmacharya Sage*), 90-second neurological override SOS modal, encrypted-feel journal, and live check-in wall.
Seed: Gamify No Nut	Evolving 3D interactive orbs, hypnosis audio, somatic breathwork, AI coach, integrated porn blocker	110-node Golden-Spiral 3D HTML5 Canvas Orb with touch/drag physics, 432Hz Web Audio binaural drone synthesizer, 3 breathwork pacers, and AI Neural Mentor.
NoBeep: Quit Porn & Reboot	90-day reboot plan with milestone badges, daily coaching, non-destructive relapse trigger logging	90-day dopamine/androgen Chart.js trajectory, trigger/emotion taxonomy in `sc_relapse_logs`, and downloadable system `hosts` / DNS blocker shield.

Inspiration Source	Core Mechanics Adopted	SeedController Implementation Details
Transcend Retention	Privacy-first offline-capable tracker, Aura progression points, daily habit builder, fasting tracker	6 daily energy-transmutation habits (+25 to +40 XP each) and a live Intermittent Fasting timer (`16:8`, `18:6`, `20:4`, `24h`) with autophagy zone detection.
Rising Drop	Dual-streak system (separating P and MO habits), 12-week visual ladder, historical record preservation	Independent timestamps for `pmo_start_time`, `p_start_time`, and `mo_start_time` plus a 12-week visual progress ladder and preserved all-time best streak.

1.2 Full-Stack Directory & File Structure

When you extract `seedcontroller-netlify.zip`, the project is organized so Netlify automatically detects your static publish root (`.`) and compiles your Node.js serverless functions (`netlify/functions/`) using `esbuild`:

```
seedcontroller-netlify/
├── index.html                    # Main responsive UI (8 navigation tabs + 4 modals)
├── styles.css                    # Glassmorphic cosmic-purple & solar-gold design

2. Command Center & Bio-Energetic Telemetry

The **Command Center** (Tab 1) serves as your daily operational dashboard. Every visual component is engineered to provide immediate physiological feedback while maintaining zero horizontal overflow across mobile, tablet, and desktop breakpoints.

2.1 Evolving 3D Interactive Aura Orb & Harmonic Ranks

Located in the upper-left hero panel, the **3D Interactive Aura Orb** renders 110 harmonic nodes distributed along a Fibonacci golden spiral on an HTML5 `<canvas>`. As your clean retention streak advances from Day 0 to Day 180+, the orb automatically evolves its core color, stage title, and Solfeggio bio-field frequency across eight distinct tiers:

Tier	Min Days	Rank Title	3D Orb Stage & Frequency	Neuro-Endocrine Benchmark
Rank I	Day 0+	Seed Initiate	Ember Seed • 396 Hz	Initial prefrontal commitment; interrupting automatic limbic cue-routine loops.
Rank II	Day 3+	Spark Keeper	Vital Spark • 417 Hz	Acute dopamine withdrawal peak; restlessness begins converting into physical drive.
Rank III	Day 7+	Endocrine Guardian	Androgen Pulse • 432 Hz	Day-7 serum testosterone surge (+145.7% of baseline per Jiang et al., 2003).
Rank IV	Day 14+	Neural Warrior	Solar Core • 528 Hz	Deeper REM sleep architecture, steadier eye contact, and vocal resonance.
Rank V	Day 30+	Alchemical Transmuter	Ojas Vortex • 639 Hz	Accelerated DeltaFosB clearance; full 30-day NNN benchmark completed.
Rank VI	Day 60+	Solar Sovereign	Supernova Halo • 741 Hz	Striatal D2 dopamine receptor density substantially restored; effortless deep work.

Tier	Min Days	Rank Title	3D Orb Stage & Frequency	Neuro-Endocrine Benchmark
Rank VII	Day 90+	Ascended Architect	Crystalline Star • 852 Hz	Full 90-Day Reboot benchmark achieved; top-down prefrontal executive mastery.
Rank VIII	Day 180+	Brahmacharya Sage	Cosmic Singularity • 963 Hz	Complete sovereignty over biological impulses and purposeful life-force direction.

2.2 Dual P/MO Streak Architecture & Non-Destructive Relapse Logging

Inspired by *Rising Drop* and *NoBeep*, SeedController separates your retention journey into three independent counters stored in the `sc_profiles` table:

- **Main PMO Retention Streak (`pmo_start_time`)**: Tracks complete abstinence from both visual pornography and physical release down to the second.
- **P-Free Visual Purity Track (`p_start_time`)**: Tracks total days free from artificial supernormal visual stimuli. If a practitioner experiences an MO-only slip without viewing pornography, they can select `MO_ONLY` in the relapse modal—resetting the MO timer while keeping their P-Free streak intact.
- **All-Time Best Streak (`longest_streak_days`)**: Updated automatically via PostgreSQL `GREATEST(longest_streak_days, ...)` so your historical record is never lost even if you reset your active counter.

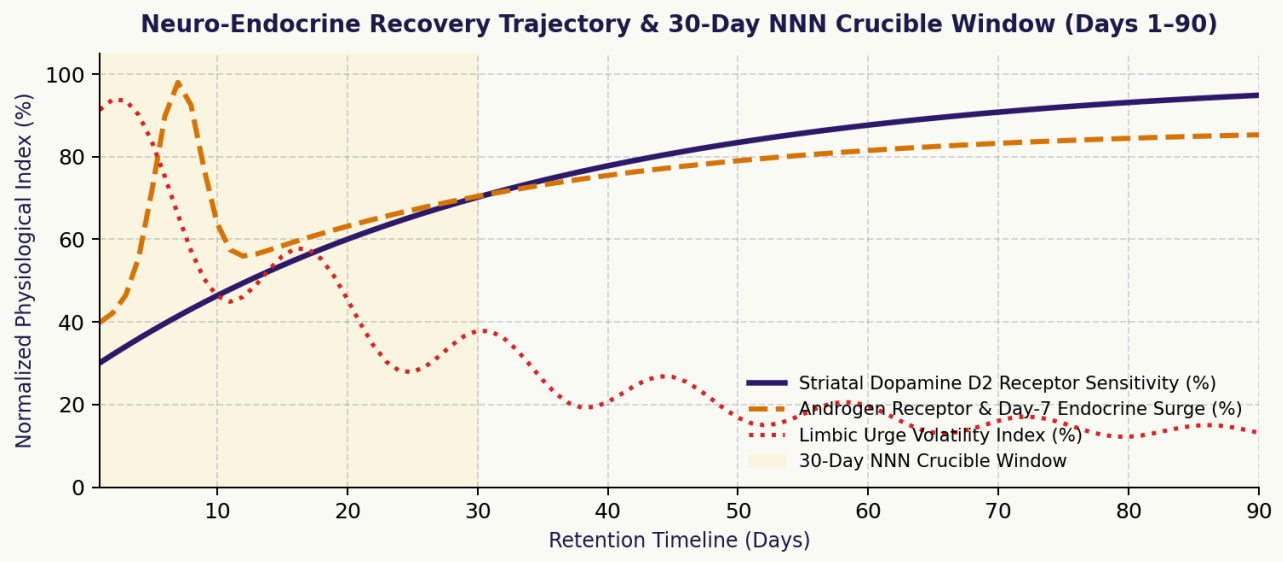

Figure 1: Mathematical model of Striatal Dopamine D2 Receptor resensitization, the Day-7 Endocrine Surge (Jiang et al., 2003), and Limbic Urge Volatility decay across the 30-day NNN window and 90-day reboot cycle.

2.3 Daily Energy Transmutation Habits & Intermittent Fasting Tracker

Retention without transmutation creates internal friction. The Command Center includes six daily discipline rituals (*Cold Shower Vagal Reset*, *10-Min Pranayama*, *Compound Strength Training*, *90-Min Deep Work*, *Zero Peek/Edging*, and *Digital Sunset Curfew*) that write directly to `sc_daily_habits`. Beside the habit checklist, the **Intermittent Fasting Tracker** supports `16:8`, `18:6`, `20:4`, and `24h` protocols, transitioning into the **Autophagy & BDNF Zone** once your elapsed fast crosses 12 hours.

---

3. The No Nut November (NNN) Challenge War Room

Clicking 🍂 **NNN Challenge Hub** in the main navigation bar opens a seven-pane command center dedicated to the annual 30-day November crucible. The top hero banner showcases our custom-generated *Spartan Autumn Citadel* mural alongside a context-aware clock: outside November, it counts down to **November 1st (00:00:00)**; during November, it switches automatically to a live 30-day survival countdown.

3.1 The 30-Day Interactive Survival Matrix (`sc_nnn_daily_tracker`)

Pane 1 features a 30-tile interactive grid representing `Nov 1` through `Nov 30`. Clicking any day cycles its state through four visual modes and persists the update to NeonDB:

- **Clean Survived (🛡️ `Clean` — Emerald Glow)**: Marks the day victorious and awards **+25 Aura XP**.
- **High-Urge Survived (🔥 `Urge Won` — Amber Glow)**: Records that you experienced a severe urge wave on that day of November but held the line without relapsing.
- **Fallen / Slip (💀 `Slip` — Crimson Glow)**: Logs a slip on that specific calendar date for honest post-mortem analysis.
- **Pending (⏳ `Pending` — Neutral Glass)**: Default state for upcoming or unlogged November days.

3.2 Real-Time NNN Urge Intensity Thermometer & Defcon Prescriptions

Beside the 30-day calendar sits the **NNN Urge Intensity Thermometer**—a real-time `0–10` bio-telemetry slider that classifies your current internal state into three tactical Defcon tiers:

- **0–3 / 10 (DEFCON 5 • SOVEREIGN CALM)**: Prefrontal executive circuits are in full command. The system prescribes channeling surplus calm into a 90-minute coding, study, or strength session.
- **4–6 / 10 (DEFCON 3 • ELEVATED VOLTAGE)**: Sympathetic arousal is rising. The system instructs you to close all social media feeds, hydrate, and execute 3 cycles of 4-7-8 Vagal Brake breathwork.
- **7–10 / 10 (DEFCON 1 • RED ALERT OVERRIDE)**: Acute limbic hijack risk. The badge pulses red and prescribes immediate physical relocation—standing up from your desk or bed, leaving your device

in another room, splashing cold water on your face to trigger the mammalian dive reflex, and performing 30 pushups.

Figure 2: The Cyber-Stoic Aegis Shield mural integrated into the NNN Visual Gallery and Urge Defense architecture.

3.3 Live Reddit Subreddit Scraper & Top 50 NNN YouTube Cinema

Panes 2 and 3 of the NNN War Room connect your dashboard to live community and video streams:

- **Live Reddit Scraper (Pane 2)**: Pulls active threads, flair badges, self-text previews, upvote velocity, and comment counts from `r/nonutnovember`, `r/SemenRetention`, `r/NoFap`, and `r/selfimprovement`. When `REDDIT_CLIENT_ID` and `REDDIT_CLIENT_SECRET` are provided, `public-feed.js` negotiates an OAuth2 bearer token (`https://oauth.reddit.com`); otherwise, it scrapes the public JSON feed directly.
- **Top 50 NNN & Retention YouTube Cinema (Pane 3)**: Provides a searchable, filterable catalog of the **Top 50 NNN, Dopamine Detox, Neurobiology, and Stoic Discipline videos** (featuring Andrew Huberman, Gary Wilson, Improvement Pill, Academy of Ideas, Daily Stoic, Wim Hof, and more), plus live search via the **YouTube Data API v3**. Clicking any card loads the video immediately inside the embedded privacy-enhanced cinema player (`youtube-nocookie.com/embed/...`).

3.4 Funny Stories Vault, 3,500-Year History Timeline & Mural Gallery

Panes 4, 5, and 6 celebrate the humor, history, and visual art of the movement:

- **NNN Funny Stories & Superpower Lore (Pane 4)**: Practitioners can read and submit comedic NNN chronicles—such as mythical Day-12 gym teleportation or the Great Peanut Butter Misunderstanding—stored permanently in the `sc_nnn_stories` NeonDB table with interactive *Laugh Salute* counters.
- **Chronological History of NNN (Pane 5)**: Traces the 3,500-year lineage from Vedic *Brahmacharya* and Classical Greek Olympic abstinence to Napoleon Hill's 1937 *Sex Transmutation* chapter, the 2003 Jiang et al. Day-7 testosterone study, the November 3, 2011 Urban Dictionary coinage of "No Nut November", and the 2017–2026 global bio-optimization wave.

- **Mural, Clip-Art & Live Pixabay Gallery (Pane 6)**: Displays the three custom high-resolution murals alongside live warrior and meditation illustrations fetched dynamically from the **Pixabay REST API**.

Figure 3: Classical neo-mythological mural illustrating Ojas sublimation and neural pathway illumination inside the NNN History & Lore module.

---

4. Complete NeonDB PostgreSQL Schema & SQL Migration Guide

SeedController uses eight relational tables in NeonDB PostgreSQL. Every table name is prefixed with `sc_` so you can safely host them inside an existing NeonDB database (even alongside tables from your other personal apps) with zero naming collisions.

4.1 Summary of All 8 PostgreSQL Tables

Table Name	Primary / Unique Key	Stored Columns & Purpose
`sc_profiles`	`profile_key VARCHAR(64)`	Stores `display_name`, `pmo_start_time`, `p_start_time`, `mo_start_time`, `longest_streak_days`, `aura_points`, fasting state, and custom blocked domains.
`sc_daily_habits`	`(profile_key, habit_code, completed_date)`	Logs daily completed transmutation habits and Aura XP rewards with automatic date partitioning.

Table Name	Primary / Unique Key	Stored Columns & Purpose
`sc_relapse_logs`	`id SERIAL`	Non-destructive historical ledger storing `streak_type`, `streak_days_achieved`, `trigger_category`, `emotional_state`, and `lesson_learned`.
`sc_journal_entries`	`id SERIAL`	Stores private reflections including `title`, `mood`, `energy_level` (1–10), `urge_intensity` (1–10), and `content`.
`sc_blogs`	`id SERIAL`	Stores science articles and user field reports with `category`, `summary`, `content`, `source_url`, and `upvotes`.
`sc_community_checkins`	`id SERIAL`	Stores Brotherhood accountability pledges with `handle`, `rank_badge`, `streak_days`, `pledge_text`, and `sparks`.
`sc_nnn_daily_tracker`	`(profile_key, challenge_year, day_number)`	**NEW FOR NNN:** Stores the 30-day November survival grid (`day_number` 1–30, `status`, `urge_level` 0–10, `trigger_note`).
`sc_nnn_stories`	`id SERIAL`	**NEW FOR NNN:** Stores funny NNN survival stories, `day_tag`, `humor_tag`, `story_body`, and `laugh_sparks`.

4.2 Exact SQL Script for NeonDB SQL Editor

If you already created the first 6 tables earlier, you only need to run the `CREATE TABLE IF NOT EXISTS` statements for Tables 7 and 8 below (or run the full `sql/schema.sql` file, which is 100% idempotent):

```
-- Execute in Neon Console -> SQL Editor (https://console.neon.tech)

CREATE TABLE IF NOT EXISTS sc_nnn_daily_tracker (
    id SERIAL PRIMARY KEY,
    profile_key VARCHAR(64) NOT NULL DEFAULT 'default_monk',
    challenge_year INTEGER NOT NULL DEFAULT 2026,
    day_number INTEGER NOT NULL CHECK (day_number BETWEEN 1 AND 30),
    status VARCHAR(24) NOT NULL DEFAULT 'survived',
    urge_level INTEGER NOT NULL DEFAULT 2 CHECK (urge_level BETWEEN 0 AND 10),
    trigger_note VARCHAR(220) DEFAULT '',
    logged_at TIMESTAMPTZ NOT NULL DEFAULT NOW(),
    UNIQUE(profile_key, challenge_year, day_number)
);

CREATE TABLE IF NOT EXISTS sc_nnn_stories (
    id SERIAL PRIMARY KEY,
    author_handle VARCHAR(80) NOT NULL DEFAULT 'Spartan_Day14',
    day_tag VARCHAR(40) NOT NULL DEFAULT 'Day 14 of NNN',
```

```
    title VARCHAR(200) NOT NULL,
    story_body TEXT NOT NULL,
    humor_tag VARCHAR(60) NOT NULL DEFAULT 'Superpower Meme Lore',
    laugh_sparks INTEGER NOT NULL DEFAULT 42,
    created_at TIMESTAMPTZ NOT NULL DEFAULT NOW()
);
```

5. Live Public APIs & Step-by-Step API Key Guide

SeedController integrates five live external data feeds through `/.netlify/functions/public-feed` and browser-side CORS fetchers. Every API is designed with a **dual-mode architecture**: it supports official API keys for high-volume authenticated queries while maintaining a built-in zero-key fallback so your site never displays broken panels even before you add keys.

API Provider	Env Variable Name	Key Required?	Exact Steps to Obtain Free API Key
YouTube Data API v3	`YOUTUBE_API_KEY`	Optional (50-video index built in)	1. Visit `console.cloud.google.com` and create a project. 2. Open **APIs & Services → Library**, search **YouTube Data API v3**, and click **Enable**. 3. Go to **Credentials → Create Credentials → API Key** and copy the key.
Reddit OAuth2 API	`REDDIT_CLIENT_ID` & `REDDIT_CLIENT_SECRET`	Optional (Public JSON works keyless)	1. Visit `reddit.com/prefs/apps` and click **create another app...** 2. Choose **script**, set redirect URI to `http://localhost:8888`. 3. Copy the 14-char ID under the app title and the 27-char secret.
Pixabay REST API	`PIXABAY_API_KEY`	Optional (3 custom murals built in)	1. Sign up for a free account at `pixabay.com`. 2. Visit `pixabay.com/api/docs/` and scroll to **Parameters**. 3. Copy your personal API key displayed in the green box.
NIH NCBI PubMed API	`NCBI_API_KEY`	Optional (3 req/s free keyless tier)	1. Sign in at `ncbi.nlm.nih.gov/account/settings/`. 2. Scroll to **API Key Management** and click **Create an API Key** (raises limit to 10 req/s).

API Provider	Env Variable Name	Key Required?	Exact Steps to Obtain Free API Key
DummyJSON Quotes	*None*	No Key Required	Completely open public JSON endpoint (`dummyjson.com/quotes/random`) with timestamp cache-busting.

5.1 Two Ways to Supply Your API Keys

1. **Method A — Netlify Environment Variables (Recommended for Production)**: In your Netlify Dashboard, navigate to **Site configuration → Environment variables**, add `DATABASE_URL` along with any of the optional keys above (`YOUTUBE_API_KEY`, `REDDIT_CLIENT_ID`, `REDDIT_CLIENT_SECRET`, `PIXABAY_API_KEY`, `NCBI_API_KEY`), and trigger a redeploy.
2. **Method B — In-App Live API Keys Vault (Instant Browser Testing)**: Open the 🍂 **NNN Challenge Hub** tab, click the 🔑 **Live API Keys Vault** sub-tab on the far right, paste your keys into the input boxes, and click 💾 **Save API Keys & Refresh All Live Feeds**.

---

6. Complete Start-to-End Netlify Deployment & User Manual

6.1 Step-by-Step Deployment Checklist

1. **Extract the Bundle**: Unzip `seedcontroller-netlify.zip` on your workstation. Verify that `package.json`, `netlify.toml`, `index.html`, `styles.css`, `app.js`, `assets/murals/`, `favicon/`, `sql/schema.sql`, and `netlify/functions/` are present.
2. **Install Node Dependencies & Push to GitHub**:

```
cd seedcontroller-netlify
npm install
git init
git add .
git commit -m "Deploy SeedController + NNN War Room v2.0"
git branch -M main
git remote add origin https://github.com/<your-username>/<your-repo>.git
git push -u origin main
```

3. **Import Project in Netlify**: Log in to `app.netlify.com`, click **Add new site → Import an existing project**, and select your GitHub repository. Netlify will read `netlify.toml` and configure `publish = "."` and `functions = "netlify/functions"` automatically.
4. **Configure Environment Variables**: Go to **Site configuration → Environment variables → Add a variable**. Add `DATABASE_URL` with your NeonDB connection URI (`postgresql://user:pass@ep-...neon.tech/your_db_name?sslmode=require`), plus any optional API keys.

5. **Trigger Production Deploy & Run Diagnostics**: Navigate to **Deploys → Trigger deploy → Deploy site**. Once live, open your site, verify the glowing green **NeonDB Connected** pill in the header, or click **Test Endpoint Now** inside the 🗄️ **NeonDB & Blocker Setup** tab.

6.2 Daily Practitioner Operating Manual

- **Morning Protocol (Command Center)**: Check your live PMO and P-Free timers, click 🔄 **New Quote** for a fresh Stoic transmission, start your `16:8` or `18:6` Intermittent Fasting window, and check off your morning cold exposure and pranayama habits.
- **Midday NNN War Room Check-In**: Open 🍂 **NNN Challenge Hub**, mark today's date tile on the 30-day calendar grid, scrape live encouragement from `r/nonutnovember`, or watch one neurobiology briefing from the Top 50 YouTube Cinema.
- **Acute Urge Defense (Anytime Day or Night)**: Click the red 🚨 **Urge SOS** button in the header to launch the 90-second override timer, or slide the **NNN Urge Thermometer** to receive an immediate Defcon prescription and pair it with the **432Hz Theta Binaural Hypnosis Drone** and *4-7-8 Vagal Brake* breathwork pacer.
- **Evening Reflection & Cloud Sync**: Log your daily energy and urge scores in the 📓 **Journal & Community** tab (+30 Aura XP) and salute fellow practitioners on the Brotherhood Wall.
